Introduction to Transformations
For each graph apply the following transformation and graph the function on the same grid.

1. Translate the graph 2 units to the left.

For the new graph state the:
Domain:
Range:
X-intercept:
Y-intercept:
2. Translate the graph 5 units down.

| Original Point | Image Point |
| :--- | :--- |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |

For the new graph state the:
Domain:

Range:
X-intercept:
Y-intercept:
3. Translate the graph 2 units right and 3 units up.

| Original Point | Image Point |
| :--- | :--- |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |

For the new graph state the:
Domain:
Range:
X-intercept:
Y-intercept:
4. Leaving the $x$-value the same, multiply the $y$-value of each point by 2 .

| Original Point | Image Point |
| :--- | :--- |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |

For the new graph state the:
Domain:
Range:
X-intercept:
Y-intercept:
5. Leaving the $y$-value the same, multiply the $x$-value of each point by 2 .

| Original Point | Image Point |
| :--- | :--- |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |

For the new graph state the:
Domain:
Range:
X-intercept:
Y-intercept:
6. Switch the $x$ and $y$ values for each point. Example (2, -3 ) becomes $(-3,2)$.

| Original Point | Image Point |
| :--- | :--- |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |

For the new graph state the:
Domain:

Range:
X-intercept:
Y-intercept:
